STAFFING

Client: Pentalog
European software company

Profiles: Data engineers and DevOps

What they needed:
Pentalog was looking to add LATAM specialists to their teams, with high English language skills and very specific technical requirements.

The solution:
We conducted a meticulous selection process, resulting in the successful recruitment of 3 data engineers and 1 DevOps from Colombia, Costa Rica, and Argentina. The outcomes have been remarkably positive, prompting Pentalog to keep placing its confidence in these professionals, and contacting our company whenever they need new talent.

- More than a year working together.

- 3 data engineers and 1 DevOps specialist have been assigned to their team.
