

PAYMENT GATEWAY

Client: Texas Technology Holding

They needed: Digital online payment gateway for their merchants to process credit cards and check payments through their web portals or mobile applications.

We developed a full REST API payment gateway using .NET, Angular, Sql Server and Azure. Compatible with all major card brands, it's also integrated with Paypal as well as the Automated Clearing House (ACH) system. It allows QR code payments and it has its own Invoice and Recurring Billing modules.

- 3000 merchants taking payments across the US
- 160 M dollars processed the last year
- 270 K sales processed the last year
- 6 Independent Sale Offices from FL, TX, CT, GA and AZ selling our product
